CARPE DIEM

EXC **TREME** **EXPERIENCE** **EXCITING**

The Maldives, commonly known as the “Pearls of the Indian Ocean” lie on the equator southwest of Sri Lanka. An archipelago of 26 major atolls and 1,190 coral reef islands stretch over 800km from north to south and over 100km from east to west. Only 200 of these islands are inhabited and nearly half of these have been developed as exclusive resorts. Diving in the Maldives can only be described as simply spectacular! There are hundreds of dive sites scattered throughout the islands and plenty of good house reefs, many of which are considered world class. New dive sites are being discovered regularly.
